

JULIO CESAR FERNANDEZ

PROFESSOR / COMPUTER ENGINEER

ABOUT ME

My goal is to contribute and enhance the skills that I have been developing with my training in a place committed to the constant growth of its collaborators. I stand out for my versatility in problem solving, good programming practices, autonomy and assertiveness in my interpersonal relationships.

As a web developer I stand out for the aesthetics of my products and their functionality. I have developed web applications using the SCRUM methodology, which has allowed me to enhance skills such as teamwork and the achievement of collective objectives in an agile way.
